

BABYBTC (\$BABYBTC)

Whitepaper - Web Version

The BABYBTC Whitepaper aims to educate readers on our vision, strategy and roadmap. Below we illustrate in detail our unique redistribution mechanism. It's an engineering achievement unheard of until now in the BSC ecosystem. We are happy to be the pioneers and are excited to showcase the new use cases that this will enable. Safemoon was the one to bring awareness around RFI and HODL rewards. BABYBTC will carry the innovation torch forward. We will share our vision with the world: the first auto-claim BTC reward mechanism.

BABYBTC in a nutshell

BABYBTC is the next evolution of a yield-generating contract on the Binance Smart Chain (BSC): you get rewarded in BTC instead of tokens. The token contract employs a static rewards system—13% of every transaction is split in two:

- 5% BTC is redistributed to holders
- 3% is used to fuel the liquidity pool exchange growth
- 5% Marketing wallet

<p>7%</p> <p>REDISTRIBUTION</p> <p>IN BTC + BUYBACK AND BURN SIMURGH</p>	<p>AUTO PAID</p> <p>EVERY HOUR</p>	<p>3%</p> <p>AUTO LIQUIDITY POOL</p>	<p>ANTI-DUMP</p> <p>& 1% SELL FEE</p>
<p>5% of every buy/sell is taken and redistributed to all holders. HOLD \$BABYBTC tokens, earn BTC.</p> <p>Minimum 200,000 tokens.</p>	<p>You don't need to claim your earned BTC.</p> <p>It's automatically sent to your wallet each hour.</p>	<p>3% of every transaction is transformed into liquidity.</p> <p>It's automatic and helps to reduce the price impact.</p>	<p>Sells are restricted to less than 0,1% of the total supply + extra 1% fee is applied to all sells. This Will allow us to reduce the swing-trading and break whales' control.</p>

Classic redistribution

This is a concept that was popularized by Safemoon. The mechanism incentivizes token holders to hold in order to earn dividends from the transactions (buys and sells). Redistribution is based on percentage (in the contract), current token balance and number of holders. You receive more tokens automatically.

BABYBTC redistribution

We created a unique system that auto-claims for every single holder the amount due. We call it the BABYBTC PROTOCOL.

The way it works for holders: You buy tokens and hold them, every 60 minutes you'll automatically receive BTC in your wallet. Not a single action is required.

Your BABYBTC tokens amount is persistent and won't change.

Behind the scenes:

The contract keeps track in an array of all token holders

- The contract keeps an index into the array for processing
- Every transaction processes a certain number of users, depending on the transaction size (bigger token transfers can process more, since the gas will still be proportionally less than the value of the tokens)
- The token is based on a Dividend-Paying Token Standard, which means all BTC the contract gains will be split equally proportionally to the token holders.
- When a user is processed, the contract checks how many withdrawable dividends they have, and if it is above the minimum threshold for auto-claims, will either automatically claim

those dividends for BTC, or automatically buy back tokens for them. This system is fully automated and doesn't add minimal gas fees proportional to value transferred. The number of holders processed through each transaction is dynamic and based on transaction size. Holders will receive dividends from the queue based on their position in the array. It's a fair system, fully automated. Minimum token balance is 200,000 BABYBTC tokens to receive BTC distributions.

DEX public listing

Following the presale, BABYBTC tokens will become available for purchase on PancakeSwap Exchange.

Token Information (provisional)

Network: **Binance Smart Chain (BEP-20)**

Ticker: **BABYBTC**

Contract address: **0x362Df1BEe43C38091E730F1F52862fc004e4768d**

Decimals: **18**

FAIR LAUNCH

TOTAL SUPPLY : **100,000,000,000**

TOKENS FOR PANCAKE LISTING : **100,000,000,000 (100%)**

Fair Launch Time : **17 November at 10 pm (UTC)**

Liquidity Locked: **100%**

Security of BABYBTC

Locked Liquidity Initial liquidity will be locked for a minimum of 12 months to provide holders with peace of mind that the token can always be exchanged. A trusted 3rd party, Dxlock, will operate as the middle man to ensure that all raised liquidity is locked in a secure locker for the full timeframe.

Other features

Extra 1% Sell fee Swing trading is a common practice that can affect price action. To incentivize holding and reducing pump/dump dynamics, we added an extra **1%** sell fee on top of the initial 15% transaction fee.
